

Oakmark Global Select Fund

At Oakmark, we are long-term investors. We attempt to identify growing businesses that are managed to benefit their shareholders. We will purchase securities only when priced substantially below our estimate of intrinsic value. After purchase, we patiently wait for the gap between price and intrinsic value to close.

Objective

Fund seeks capital appreciation by investing in approximately 20 large-capitalization companies from around the world.

Oakmark Global Select Fund

To obtain most recent month-end performance data, visit Oakmark.com. Before investing in any Oakmark Fund, you should carefully consider the Fund's investment objectives, risks, management fees and other expenses. This and other important information is contained in a Fund's prospectus and summary prospectus. Please read the prospectus and summary prospectus carefully before investing. For more information, please visit Oakmark.com or call 1-800-OAKMARK (1-800-625-6275).

The cumulative effect of fees and expenses can substantially reduce the growth of a participant's or beneficiary's retirement savings. For more information regarding the long-term effects of fees and expenses on an investment, visit the Department of Labor's website at: http://www.dol.gov/ebsa/publications/401k_employee.html

Because the Oakmark Global Select Fund is non-diversified, the performance of each holding will have a greater impact on the Fund's total return, and may make the Fund's returns more volatile than a more diversified fund.

Investing in value stocks presents the risk that value stocks may fall out of favor with investors and underperform growth stocks during given periods.

Investing in foreign securities presents risks which in some ways may be greater than U.S. investments. Those risks include: currency fluctuation; different regulation, accounting standards, trading practices and levels of available information; generally higher transaction costs; and political risks.

Market Cap is the market price of an entire company. The Price-to-Earnings (P/E) Ratio is the most common measure of how expensive a stock is. Price-to-Cash Flow (P/C) is defined as a stock's capitalization divided by its cash flow. The Price-to-Book (P/B) Ratio is a stock's capitalization divided by its book value. P/E, P/C, and P/B are projected calculations based on our analysts' estimates.
